Please find below and/or attached an Office communication concerning this application or proceeding.

F	Application No.	Applicant(s)				
	09/696,232	ISHIKAWA ET AL.				
Office Action Summary	Examiner	Art Unit				
	Allan W Olsen	1763				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address						
Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status  1)⊠ Responsive to communication(s) filed on <u>02 l</u>	December 2003 .					
,— ,— ,	nis action is non-final.					
3) Since this application is in condition for allows		rosecution as to the merits is				
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4) Claim(s) 1-5,13 and 14 is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6) Claim(s) 1-5,13 and 14 is/are rejected.						
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/or election requirement.  Application Papers						
9) The specification is objected to by the Examiner.						
10)⊠ The drawing(s) filed on <u>18 March 2003</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner.						
If approved, corrected drawings are required in reply to this Office action.						
12) The oath or declaration is objected to by the Examiner.						
Priority under 35 U.S.C. §§ 119 and 120						
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).						
a)⊠ All b)⊡ Some * c)⊡ None of:						
1. ☐ Certified copies of the priority document	ts have been received.					
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  * See the attached detailed Office action for a list of the certified copies not received.						
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).						
a) ☐ The translation of the foreign language provisional application has been received.  15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.						
Attachment(s)						
1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449) Paper No(s)	5) Notice of Informal	ry (PTO-413) Paper No(s) I Patent Application (PTO-152)				

Application/Control Number: 09/696,232

Art Unit: 1763

#### **DETAILED ACTION**

## Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 2, 2003 has been entered.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,658425 issued to Halman et al. (hereinafter, Halman). Halman teaches using a plasma comprising CF<sub>4</sub>, Ar and N<sub>2</sub> to etch a multi-layered oxide. Halman teaches the multilayered oxide may comprise a BPSG (Halman's layer 5) with an overlying layer of TEOS (Halman's layer 8) which corresponds to Applicant's claimed organic film containing Si. Halman teaches the multilayered oxide may also comprise an overlying layer of a planarizing spin-on-glass. Halman provides examples in which the amount of N<sub>2</sub> is less than the amount of CF<sub>4</sub>, however, Halman teaches that an unlimited amount of N<sub>2</sub> may be used. See: abstract; column 4, lines 18-21, 35-41 and 50-53; and column 5, lines 8-12.

Application/Control Number: 09/696,232

Art Unit: 1763

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Halman as applied to claim 1 above, and further in view of US Patent 5,721,156 issued to Matsuura (hereinafter, Matsuura).

Halman does not teach that the Si-containing organic layer is a polysiloxane.

Matsuura teaches forming a TEOS derived polymeric layer. Matsuura teaches that a polysiloxane can be used in place of the TEOS layer.

It would have been obvious to one skilled in the art to use a polysiloxane because in semiconductor fabrication processes TEOS layers are generally polymeric layers that are derived from TEOS and these TEOS derived polymeric layers typically comprise polysiloxane. Alternatively, it would have been obvious to use a polysiloxane because Matsurra teaches that a TEOS derived layer and a polysiloxane layer are functionally equivalent.

### Response to Arguments

Applicant's arguments have been considered but are moot in view of the new grounds of rejection.

Application/Control Number: 09/696,232

Art Unit: 1763

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US patent 5,835,987 notes that the dielectric constant of TEOS is 3.0.

US Patent 5,262,358 demonstrates that TEOS is a polysiloxane precursor.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Olsen whose telephone number is 571-272-1441. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Mills, can be reached on 571-272-1439.

The fax number for TC1700 is 703-872-9306 (non-after finals and after-final).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is Ma Olse (571) 272-1300.

Allan Olsen, Ph.D. February 19, 2004
